

WINTER STORM CLEAN-UP

Andover DPW crews are working diligently to manage the debris from the storms that occurred in March 2018. Town of Andover crews are working with NGRID and other utilities to clear trees, brush and other debris from public ways.

The following is helpful information for residents about the options for managing their trees and brush downed by the storm in their own yards:

Bald Hill Composting Facility

Residents may purchase a Bald Hill Composting Facility permit for \$25 per year to bring their brush to the Town's Bald Hill Composting Facility. We accept trees and brush up to 6" in diameter and 4' in length, and it must not contain any metal or plastic debris. We do not accept trees or brush from private contractors.

The Bald Hill Composting Site will have an early opening date of March 30th

Please check on the Town's website at AndoverMa.Gov/BaldHillCompost, or on our social media channels (linked below) for updates regarding the site schedule.

Curbside

Republic Services will pick up brush at the curb. Twigs/branches up to 6" in diameter and 4' in length are allowed in the weekly trash pickup. Bundles must weigh 50 lbs or less and a limit of four bundles per week is allowed.

[Click Here](#) for the Recycling and Trash Guide for Residents.

Private Contractors

Residents may hire private contractors at their own expense to remove trees and brush from their property.

Much of the storm debris is still frozen in snow banks and it will take weeks to complete our cleanup operations. We appreciate your patience as Andover DPW crews work to clean up after this challenging month.
